Backend-focused Software Engineer with hands-on experience in Go, Node.js, REST APIs, WebSockets, OAuth 2.0, and Database. Skilled in designing scalable systems, secure authentication services, and developer-focused tools with an emphasis on performance and maintainability.

WORK EXPERIENCE

Web Developer, *Freelance*

2024 – Present | Remote

- Collaborated with clients to gather requirements, design technical solutions, and deploy production-ready web applications.
- Designed and developed RESTful APIs and backend services using Node.js and Express.
- Built customized product catalog systems with secure inquiry and contact management functionality.
- Optimized application performance, responsiveness, and SEO while maintaining scalable and maintainable codebases.

PROJECT

AuthSphere , *authentication platform*

winter 2025 – Present

- Designed and developed a centralized authentication platform implementing OAuth 2.0 Authorization Code Flow with PKCE.
- Built a reusable SDK enabling plug-and-play authentication integration across multiple web applications.
- Implemented JWT-based authentication, refresh token rotation, and middleware-based route protection.
- Developed RESTful APIs for authorization, token exchange, and session management while enforcing secure CORS policies.

AICOMM , *AI-Powered Git Commit Assistant*

spring 2025

- Developed an AI-powered CLI tool that analyzes Git diffs and generates context-aware Conventional Commit messages using LLMs.
- Integrated Git status and diff parsing to automatically summarize staged and unstaged code changes.
- Designed a lightweight CLI interface with customizable configuration, dry-run mode, and intelligent commit message generation.

SKILLS

- **Languages** — Go, JavaScript, TypeScript
- **Technologies** — Node.js, Redis, Docker, Git, REST APIs, OAuth
- **Other** — API Design, Database Design, Authentication & Authorization, Prompt Engineering, Developer Tooling

EDUCATION

B.E. in Computer (Ongoing), *Savitribai Phule Pune University*

Aug 2023 – 2027 | pune, India

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Software Engineering.
